S

1. I am a family physician who currently works for Doctor on Demand by Included Health, from September 2016 to present. Prior to this position, I was a physician for the Austin Diagnostic Clinic from November 2010- to May 2016.
2. While working in at the Austin Diagnostic Clinic, I treated Mr. Bernhardt Tiede, II, as his general practitioner, while he was living in Austin, Texas from 2014 to 2016.
3. My curriculum vitae is attached as *Exhibit 1*.
4. I am very familiar with Mr. Tiede based on my experience treating him as his personal doctor.

5. Mr. Tiede's lawyer, Jodi Cole, contacted me and requested that I review the medical records for Mr. Tiede by TDCJ, released to her office on Wednesday, August 16, 2023.
See Medical Records, Attached as Exhibit 2.
6. Ms. Cole also shared the exhibits to Mr. Tiede's federal complaint in Case No. 1:23-CV-1004-RP with me.
7. Ms. Cole reported that Mr. Tiede had a health crisis which necessitated a trip to the Huntsville Memorial Hospital's Emergency Room on Wednesday, June 21, 2023.
8. All signs and symptoms contained in Mr. Tiede's medical records and photographic evidence indicate that Mr. Tiede may have suffered a stroke.
9. Ms. Cole reported that Mr. Tiede is being housed in a TDCJ cell that has no air-conditioning and is subjected to extreme heat that interferes with Mr. Tiede's rest, recovery, sleep, and day to day activities.
10. Based on my observation of Mr. Tiede's medical records, memory of treating him as a patient, along with seeing the photograph of his face and videotaped evidence of Mr. Tiede's face, it is my professional opinion that Mr. Tiede likely had a stroke.
11. Based on my observations and medical training, the distribution of facial weakness, and the description of his acute health crisis indicates that Mr. Tiede likely had a type of brainstem stroke rather than Bell's Palsy.
12. Mr. Tiede's multiple EKGs indicate that Mr. Tiede has additionally likely had a heart attack in the past, although the medical records do not mention Mr. Tiede having a heart attack specifically.
13. Mr. Tiede's medical records do not contain ER records from the day of his health crisis; nor do they include Neurology consultation notes, despite an Urgent Neurology

consult request. TDCJ notes around the time of the health crisis do not appear fully reliable. For example, the initial note describing Mr. Tiede's health crisis contains an inaccurate description of facial droop (wrong side of the face was noted). Additionally, follow up visits after the ER evaluation were via Telehealth, and contained limited exam findings which could have further distinguished a stroke from Bells Palsy.

14. Mr. Tiede's medical records indicate that Mr. Tiede has diabetes and hypertension, conditions that are not showing positive response to TDCJ medical treatments, but rather indicates that his conditions are not being well treated or maintained. Although some medical records purport that some of Mr. Tiede's conditions are "controlled," the actual readings indicate otherwise. Other medical records document that Mr. Tiede's conditions are uncontrolled, but no changes are made in medical management in order to better treat those conditions.
15. Mr. Tiede's multiple medical conditions make him medically vulnerable to extreme heat in his housing quarters.
16. If Mr. Tiede is not immediately moved to housing that is kept air conditioned, the medical conditions that led to his current stroke could result in further injury, which may be more severe, permanent, and irreversible, including death.
17. If Mr. Tiede is housed in housing that reaches above 95 degrees Fahrenheit, it is reasonable to expect Mr. Tiede to experience a heat-related death. We know that age over 65-years, diabetes, and cardiovascular conditions increase risk for heat-related deaths. Mr. Tiede has all of these risk factors. Additionally, this does not take into account the uncontrolled nature of Mr. Tiede's medical conditions, or Mr. Tiede's recent suspected stroke.

18. It is my professional opinion that Mr. Tiede is in danger of a heat-related death if he is not immediately moved to TDCJ housing that maintains air-conditioning and heating designed to maintain reasonable human being body temperatures.

19. I am providing this declaration in my personal capacity, not as a representative of any past or present employer.

I declare under the penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

Executed on August 29th, 2023.

CERTIFICATIONS

- Board Certified in Family Medicine since 2007
- Basic Life Support

EDUCATION

June, 2004 – July, 2007

University of New Mexico – Albuquerque, New Mexico
Family & Community Medicine Residency Program

July, 2000 – May, 2004

Baylor College of Medicine – Houston, Texas
Doctor of Medicine

- *Certificate, Biomedical Ethics Track*
- *Certificate, International Health Track*

August, 1992 – May 1998

University of Texas at Austin – Austin, Texas

Bachelor of Science in Zoology

- *High Honors*

WORK EXPERIENCE

September 2016 – current

Physician

Doctor On Demand, Telemedicine

San Francisco, CA

- Telemedicine services for all ages for acute and chronic care needs
- *Virtual Primary Care Program, 1/1/2022- present*, Providing longitudinal Primary and Chronic Care services within a virtual platform
- *Quality Review Committee Physician Representative* performing quality reviews of providers, along with recommendations for Performance Improvement Plans. Reviewing national guidelines in an effort to improve company protocols
- *Mentor Program Participant* providing outreach and support to newly hired physicians
- *Clinical Trainer* instructing newly hired physicians on company clinical policies, visit flow, and Electronic Medical Record use.

November, 2010 – 6/2016

Associate Physician

Austin Diagnostic Clinic

Austin, Texas

- Outpatient clinical services for adult and adolescent patients with an emphasis on preventative medicine, a special focus on women's healthcare issues, and full spectrum care for chronic medical problems.
- Medication assisted weight loss
- *Chair for the ADC Customer Service Task Force* working to maximize patient experience at ADC through patient survey administration and interpretation, Interdepartmental evaluations, and by improving employee satisfaction

July, 2008 – June 2010

Assistant Professor

Baylor College of Medicine, Baylor Family Medicine Clinic

Houston, Texas

- Outpatient clinical services for pediatric and adult patients with an emphasis on preventative medicine, a special focus on women's healthcare issues, and full spectrum care for chronic medical problems.
- Medication assisted weight loss
- Supervision of Physician Assistants
- *Director for the Compassion & the Art of Medicine Elective* at Baylor College of Medicine

April, 2008 – June 2010

Assistant Professor

Baylor College of Medicine, Family Medicine Residency obstetrics service at Ben Taub Hospital

Houston, Texas

- Attending physician for residents performing functions of inpatient hospital triage, admissions, deliveries, and post-partum care of mothers and newborns

November, 2007 – July 2008

Assistant Professor

Baylor College of Medicine, Harris County Hospital District Community Clinic

Houston, Texas

- Outpatient clinical services for pediatric and adult patients
- Clinic serviced primarily under-served Spanish and Vietnamese speaking population

July, 2004 – June 2007

Family & Community Medicine Resident

University of New Mexico Hospital

Albuquerque, New Mexico

- Outpatient clinical services for pediatric and adult patients
- Inpatient hospital consultations and admissions
- Inpatient hospital triage, admissions, deliveries, and post-partum care of mothers and newborns
- Longitudinal care of Nursing Home residents
- Medical Student Preceptor in clinical setting 2007
- Additional training in Women's Health issues, including abortion and colposcopy
- Additional electives included Integrative Medicine, Dermatology, and Urgent Care

June, 2006 – July 2006

International Rural Rotation

Santa Fe, Argentina and Las Lomitas, Argentina

- Diagnosed and treated patients in a variety of rural indigenous communities under the supervision of local physicians and residents

April, 2004 – May 2004

Child Family Health International

Oaxaca, Mexico

- Diagnosed and treated patients in a variety of rural community health centers under the supervision of local physicians

RESEARCH

July, 2007

Community Project for Family & Community Medicine

- Age-specific patient-oriented handouts for clinic use providing information regarding HPV, HPV vaccines, routine cervical screening, and cytology results

July, 2003 – May, 2004

Ethical Consideration of Concealment of Medication in Food

- *Literature review, not published*

June, 1996 – July, 1998

Molecular Genetics Lab – The University of Texas at Austin

Research Assistant

- Cross-transformed *Drosophila* lines to locate position of DNA insertions and create stable lines
- Created design to flight-test *Drosophila* lines

Name: TIEDE, BERNHARDT I
TDCJ#: 864378

Date: 06/22/2023 20:03
Facility: ESTELLE (E2)

Days KOP

ORDERING FACILITY: ESTELLE (E2)

S: The patient presents for right sided facial numbness that began yesterday at approximately 6pm. The patient states that around 10 pm last night his symptoms spontaneously resolved. Then at approximately 1600 today his symptoms returned. The patient denies headache or blurry vision. However, the patient does describe dizziness. The patient does not complain of any other neurologic deficits.

O: VSS PE Normal

Neuro exam. Left facial droop. Pt can bilateral wrinkle forehead. Difficulty closing left eye. Numbness to right face. Symmetric upper and lower strength. No pronator drift.

A: The patient is a 64 yo male who presents for right sided facial numbness but has left sided facial droop.

P: Pt also complains of dizziness. Bell's Palsy was considered as a possible etiology however, the patient has incongruent symptoms. The may be central in nature. Pt requires a higher level of care to rule out any central neurologic pathology.

Electronically Signed by NEWMAN, DONNELL S. MD on 06/23/2023.

Association of Glomerular Filtration Rate (GFR) and Staging of Kidney Disease*

| GFR (mL/min/1.73 m2) | With Kidney Damage | Without Kidney Damage |
|----------------------|--------------------|-----------------------|
| >90 | Stage one | Normal |
| 60-89 | Stage two | Decreased GFR |
| 30-59 | Stage three | Stage three |
| 15-29 | Stage four | Stage four |
| <15 (or dialysis) | Stage five | Stage five |

*Each stage assumes the associated GFR level has been in effect for at least three months. Stages 1 to 5, with or without kidney disease, indicate chronic kidney disease.

Notes: Determination of stages one and two (with eGFR >59mL/min/1.73 m2) requires estimation of kidney damage for at least three months as defined by structural or functional abnormalities of the kidney, manifested by either:

| SGOT) ASPARATE AMINO TRANSFER | 29 | | U/L | 13-40 | EST |
| EGFR | 64.0 | | mL/min/- 1.73m2 | | EST |

Association of Glomerular Filtration Rate (GFR) and Staging of Kidney Disease*

| GFR (mL/min/1.73 m2) | With Kidney Damage | Without Kidney Damage |
|----------------------|--------------------|-----------------------|
| >90 | Stage one | Normal |
| 60-89 | Stage two | Decreased GFR |
| 30-59 | Stage three | Stage three |
| 15-29 | Stage four | Stage four |
| <15 (or dialysis) | Stage five | Stage five |

*Each stage assumes the associated GFR level has been in effect for at least three months. Stages 1 to 5, with or without kidney disease, indicate chronic kidney disease.

Notes: Determination of stages one and two (with eGFR >59mL/min/1.73 m2) requires estimation of kidney damage for at least three months as defined by structural or functional abnormalities of the kidney, manifested by either:

Procedure: COV19 Coronavirus Covid-19 RNA Detection Test by RT-qPCR

COV19 NEGATIVE

Disclaimer

A Not Detected (Negative) test result does not preclude 2019-nCoV infection and should not be used as the sole basis for treatment or other patient management decisions. Negative results must be combined with clinical observations, patient history, and epidemiological information.

This diagnostic test is pending FDA review of validation and is being distributed prior to such review in accordance with FDA general guidance policies on coronavirus testing. Results are for the presumptive identification of 2019-nCoV RNA. KorvaLabs, Inc is certified under the Clinical Laboratory Improvement Amendments of 1988 (CLIA-88) as qualified to perform high complexity clinical laboratory testing.

Test performed and validated by KorvaLabs, Inc. CLIA # 05D2141174

| EGFR | 74.0 | | mL/min/- 1.73m2 | | HG |

Association of Glomerular Filtration Rate (GFR) and Staging of Kidney Disease*

| GFR (mL/min/1.73 m2) | With Kidney Damage | Without Kidney Damage |
|----------------------|--------------------|-----------------------|
| >90 | Stage one | Normal |
| 60-89 | Stage two | Decreased GFR |
| 30-59 | Stage three | Stage three |
| 15-29 | Stage four | Stage four |
| <15 (or dialysis) | Stage five | Stage five |

*Each stage assumes the associated GFR level has been in effect for at least three months. Stages 1 to 5, with or without kidney disease, indicate chronic kidney disease.

Notes: Determination of stages one and two (with eGFR >59mL/min/1.73 m2) requires estimation of kidney damage for at least three months as defined by structural or functional abnormalities of the kidney, manifested by either:

Procedure: COV19 Coronavirus Covid-19 RNA Detection Test by RT-qPCR

COV19 NEGATIVE

Disclaimer

A Not Detected (Negative) test result does not preclude 2019-nCoV infection and should not be used as the sole basis for treatment or other patient management decisions. Negative results must be combined with clinical observations, patient history, and epidemiological information.

This diagnostic test is pending FDA review of validation and is being distributed prior to such review in accordance with FDA general guidance policies on coronavirus testing. Results are for the presumptive identification of 2019-nCoV RNA. KorvaLabs, Inc is certified under the Clinical Laboratory Improvement Amendments of 1988 (CLIA-88) as qualified to perform high complexity clinical laboratory testing.

 Drawn: 03/18/20 01:10 Received: 03/20/20 09:48 Reported: 03/20/20 14:37

Procedure: PSA, FREE AND TOTAL

| | | | | |
|---------------------------|-----|--|-------|---------|
| PSA, FREE | 0.2 | | ng/mL | |
| PROSTATE SPECIFIC ANTIGEN | 0.5 | | ng/mL | 0.0-4.0 |

INTERPRETIVE INFORMATION: Prostate Specific Antigen

The Roche PSA electrochemiluminescent immunoassay was used. Results obtained with different test methods or kits cannot be used interchangeably. The Roche PSA method is approved for use as an aid in the detection of prostate cancer when used in conjunction with a digital rectal exam in men age 50 and older. The Roche PSA method is also indicated for the serial measurement of PSA to aid in the prognosis and management of prostate cancer patients. Elevated PSA concentrations can only suggest the presence of prostate cancer until biopsy is performed. PSA concentrations can also be elevated in benign prostatic hyperplasia or inflammatory conditions of the prostate. PSA is generally not elevated in healthy men or men with non-prostatic carcinoma.

| | | |
|------------------|----|---|
| PSA-PERCENT FREE | 40 | % |
|------------------|----|---|

INTERPRETIVE INFORMATION: Prostate Specific Antigen, Free Percentage

ARUP uses the Roche Free PSA electrochemiluminescent immunoassay method in conjunction with the Roche PSA electrochemiluminescent immunoassay method to determine the free PSA percentage. Values obtained with different assay methods should not be used interchangeably. The free PSA percentage is an aid in distinguishing prostate cancer from benign prostatic conditions in men age 50 and older with a total PSA between 3 and 10 ng/mL and negative digital rectal examination findings. Prostatic biopsy is required for the diagnosis of cancer.

In patients with total PSA concentrations of 4-10 ng/mL, the probability of finding prostate cancer on needle biopsy by age in years is:

| %fPSA | 50-59 | 60-69 | 70 or older |
|------------------|-------|-------|-------------|
| 0 - 10% | 49% | 58% | 65% |
| 11 - 18% | 27% | 34% | 41% |
| 19 - 25% | 18% | 24% | 30% |
| Greater than 25% | 9% | 12% | 16% |

Procedure: COMP. METABOLIC PANEL (80053)
 Association of Glomerular Filtration Rate (GFR) and Staging of Kidney Disease*

| GFR (mL/min/1.73 m2) | With Kidney Damage | Without Kidney Damage |
|----------------------|--------------------|-----------------------|
| >90 | Stage one | Normal |
| 60-89 | Stage two | Decreased GFR |
| 30-59 | Stage three | Stage three |
| 15-29 | Stage four | Stage four |
| <15 (or dialysis) | Stage five | Stage five |

*Each stage assumes the associated GFR level has been in effect for at least three months. Stages 1 to 5, with or without kidney disease, indicate chronic kidney disease.

Notes: Determination of stages one and two (with eGFR >59mL/min/1.73 m2) requires estimation of kidney damage for at least three months as defined by structural or functional abnormalities of the kidney, manifested by either: Pathological abnormalities or Markers of kidney damage (including abnormalities in the composition of the blood or urine or abnormalities in imaging tests).

 Drawn: 09/23/19 02:06 Received: 09/23/19 21:59 Reported: 09/23/19 22:22

Procedure: COMP. METABOLIC PANEL (80053)
 Association of Glomerular Filtration Rate (GFR) and Staging of Kidney Disease*

| GFR (mL/min/1.73 m2) | With Kidney Damage | Without Kidney Damage |
|----------------------|--------------------|-----------------------|
| >90 | Stage one | Normal |
| 60-89 | Stage two | Decreased GFR |
| 30-59 | Stage three | Stage three |
| 15-29 | Stage four | Stage four |
| <15 (or dialysis) | Stage five | Stage five |

*Each stage assumes the associated GFR level has been in effect for at least three months. Stages 1 to 5, with or without kidney disease, indicate chronic kidney disease.

Notes: Determination of stages one and two (with eGFR >59mL/min/1.73 m2) requires estimation of kidney damage for at least three months as defined by structural or functional abnormalities of the kidney, manifested by either: Pathological abnormalities or Markers of kidney damage (including abnormalities in the composition of the blood or urine or abnormalities in imaging tests).

|----------------------|--------------------|-----------------------|
| >90 | Stage one | Normal |
| 60-89 | Stage two | Decreased GFR |
| 30-59 | Stage three | Stage three |
| 15-29 | Stage four | Stage four |
| <15 (or dialysis) | Stage five | Stage five |

*Each stage assumes the associated GFR level has been in effect for at least three months. Stages 1 to 5, with or without kidney disease, indicate chronic kidney disease.

Notes: Determination of stages one and two (with eGFR >59mL/min/1.73 m2) requires estimation of kidney damage for at least three months as defined by structural or functional abnormalities of the kidney, manifested by either: Pathological abnormalities or Markers of kidney damage (including abnormalities in the composition of the blood or urine or abnormalities in imaging tests).

| Test Name | Result | ABN Flag | Unit | Reference Range | LAB ID |
|-----------|--------|----------|------|-----------------|--------|
|-----------|--------|----------|------|-----------------|--------|

Accession: DL335793K Requisition: 67798105
 Drawn:04/16/19 05:55 Received:04/17/19 04:24 Reported: 04/17/19 06:30

Procedure: LIPID PANEL, STANDARD

| | | | | | |
|--------------------|-----|---|----------------|------|----|
| CHOLESTEROL, TOTAL | 120 | | mg/dL | <200 | IG |
| HDL CHOLESTEROL | 29 | L | mg/dL | >40 | IG |
| TRIGLYCERIDES | 303 | H | mg/dL | <150 | IG |
| LDL-CHOLESTEROL | 59 | | mg/dL (- calc) | | IG |

Reference range: <100

Desirable range <100 mg/dL for primary prevention;
 <70 mg/dL for patients with CHD or diabetic patients
 with > or = 2 CHD risk factors.

LDL-C is now calculated using the Martin-Hopkins
 calculation, which is a validated novel method providing
 better accuracy than the Friedewald equation in the
 estimation of LDL-C.

Martin SS et al. JAMA. 2013;310(19): 2061-2068
 (<http://education.QuestDiagnostics.com/faq/FAQ164>)

| | | | | | |
|---------------------|-----|--|----------------|------|----|
| CHOL/HDL-C RATIO | 4.1 | | (calc) | <5.0 | IG |
| NON HDL CHOLESTEROL | 91 | | mg/dL (- calc) | <130 | IG |

For patients with diabetes plus 1 major ASCVD risk
 factor, treating to a non-HDL-C goal of <100 mg/dL
 (LDL-C of <70 mg/dL) is considered a therapeutic
 option.

| CREATININE, RANDOM URINE | 115 | | mg/dL | 20-320 | IG |
| MICROALBUMIN | 2.0 | | mg/dL | | IG |
| Reference Range | | | | | |
| Not established | | | | | |
| MICROALBUMIN/CREATININE RATIO- 17 | | | mcg/mg - | <30 | IG |
| , RANDOM URINE | | | creat | | |

The ADA defines abnormalities in albumin excretion as follows:

| Category | Result (mcg/mg creatinine) |
|----------------------|----------------------------|
| Normal | <30 |
| Microalbuminuria | 30-299 |
| Clinical albuminuria | > OR = 300 |

The ADA recommends that at least two of three specimens collected within a 3-6 month period be abnormal before considering a patient to be within a diagnostic category.

 Drawn: 04/16/19 05:55 Received: 04/17/19 06:15 Reported: 04/17/19 10:58

Procedure: PSA, TOTAL
 PSA, TOTAL 0.5 ng/mL < OR = 4.0 IG

The total PSA value from this assay system is standardized against the WHO standard. The test result will be approximately 20% lower when compared to the equimolar-standardized total PSA (Beckman Coulter). Comparison of serial PSA results should be interpreted with this fact in mind.

This test was performed using the Siemens chemiluminescent method. Values obtained from different assay methods cannot be used interchangeably. PSA levels, regardless of value, should not be interpreted as absolute evidence of the presence or absence of disease.

|---------------------------|-----|---|---------------------|------|----|
| Procedure: HEMOGLOBIN Alc | | | | | |
| HEMOGLOBIN Alc | 6.3 | H | % of to- tal Hgb | <5.7 | IG |

For someone without known diabetes, a hemoglobin Alc value between 5.7% and 6.4% is consistent with prediabetes and should be confirmed with a follow-up test.

For someone with known diabetes, a value <7% indicates that their diabetes is well controlled. Alc targets should be individualized based on duration of diabetes, age, comorbid conditions, and other considerations.

This assay result is consistent with an increased risk of diabetes.

Currently, no consensus exists regarding use of hemoglobin Alc for diagnosis of diabetes for children.

Accession: DL457038E Requisition: 62599933
 Drawn:10/02/18 06:08 Received:10/03/18 01:19 Reported: 10/03/18 03:58

Procedure: LIPID PANEL, STANDARD

| | | | | | |
|--------------------|-----|---|-------------------|------|----|
| CHOLESTEROL, TOTAL | 129 | | mg/dL | <200 | IG |
| HDL CHOLESTEROL | 30 | L | mg/dL | >40 | IG |
| TRIGLYCERIDES | 229 | H | mg/dL | <150 | IG |
| LDL-CHOLESTEROL | 70 | | mg/dL (- calc) | | IG |

Reference range: <100

Desirable range <100 mg/dL for primary prevention;
 <70 mg/dL for patients with CHD or diabetic patients
 with > or = 2 CHD risk factors.

LDL-C is now calculated using the Martin-Hopkins
 calculation, which is a validated novel method providing
 better accuracy than the Friedewald equation in the
 estimation of LDL-C.

Martin SS et al. JAMA. 2013;310(19): 2061-2068
 (<http://education.QuestDiagnostics.com/faq/FAQ164>)

| | | | | | |
|---------------------|-----|--|-------------------|------|----|
| CHOL/HDL-C RATIO | 4.3 | | (calc) | <5.0 | IG |
| NON HDL CHOLESTEROL | 99 | | mg/dL (- calc) | <130 | IG |

For patients with diabetes plus 1 major ASCVD risk
 factor, treating to a non-HDL-C goal of <100 mg/dL
 (LDL-C of <70 mg/dL) is considered a therapeutic
 option.

Accession: DL312562C Requisition: 62599882
 Drawn: 07/10/18 07:26 Received: 07/11/18 04:51 Reported: 07/11/18 07:59

Procedure: HEMOGLOBIN Alc
 HEMOGLOBIN Alc 7.8 H % of to- <5.7 IG
 tal Hgb

For someone without known diabetes, a hemoglobin Alc value of 6.5% or greater indicates that they may have diabetes and this should be confirmed with a follow-up test.

For someone with known diabetes, a value <7% indicates that their diabetes is well controlled and a value greater than or equal to 7% indicates suboptimal control. Alc targets should be individualized based on duration of diabetes, age, comorbid conditions, and other considerations.

Currently, no consensus exists regarding use of hemoglobin Alc for diagnosis of diabetes for children.

| Test Name | Result | ABN Flag | Unit | Reference Range | LAB ID |
|-----------|--------|-------------|------|--------------------|-----------|
|-----------|--------|-------------|------|--------------------|-----------|

Report Status: Complete

Accession: DL048743U Requisition: 62599882
 Drawn:10/17/17 06:37 Received:10/18/17 06:39 Reported: 10/18/17 08:04

Procedure: HEMOGLOBIN Alc
 HEMOGLOBIN Alc 7.8 H % of to- <5.7 IG
 tal Hgb

For someone without known diabetes, a hemoglobin Alc value of 6.5% or greater indicates that they may have diabetes and this should be confirmed with a follow-up test.

For someone with known diabetes, a value <7% indicates that their diabetes is well controlled and a value greater than or equal to 7% indicates suboptimal control. Alc targets should be individualized based on duration of diabetes, age, comorbid conditions, and other considerations.

Currently, no consensus exists regarding use of hemoglobin Alc for diagnosis of diabetes for children.

For the purpose of screening for the presence of
 diabetes

<5.7% Consistent with the absence of diabetes
 5.7-6.4% Consistent with increased risk for diabetes
 (prediabetes)
 >or=6.5% Consistent with diabetes

This assay result is consistent with diabetes
 mellitus.

Currently, no consensus exists for use of hemoglobin
 Alc for diagnosis of diabetes for children.

CORRECTIONAL MANAGED HEALTH CARE
Chronic Care Clinic Note

Patient Name: TIEDE, BERNHARDT I
 TDCJ#:864378

Date: 12/30/2022 13:10
 Facility: ESTELLE (E2)

Visit information:

Telehealth: Yes

Reason for visit: COPD, Diabetes Type 2, Hyperlipidemia, Hypertension

Subjective:

Lifestyle compliance:

Reported compliance to prescribed diet: Some of the time

Chronic problem(s):

COPD

Comments: stable

Diabetes

Type of Diabetes: Type 2 - Non-insulin dependent

Hyperlipidemia

Cardiac risk factors: Sedentary lifestyle

Hypertension

Cardiac risk factors: Sedentary lifestyle

Assessment / Diagnostic plan (all chronic problems):

Diabetes - Type 2 - Non-Insulin-Dependent

Continue present management

Hyperlipidemia

Continue present management

Hypertension

Continue present management

General plan:

Diet order:

Therapeutic Diet order:

Patient Order Added: DIET ORDER-DIET FOR HEALTH W/BEDTIME SNACK (DFH)DB Order Date:

12/30/2022 13:14:06 User: BARBER, MARK A

Patient problem list has been reviewed and updated as necessary: Yes

PULHES / Restrictions: No changes necessary

Continuity of Care / Discharge Planning: Patient will NOT require continuity of care planning by TCOOMMI prior to discharge from TDCJ.

Disposition:

Schedule next CCC visit:

Reminder Completed: CCC CHRONIC CLINIC REMINDER

Reminder Date: 02/28/2023 13:14

To Do User Type: PHYSICIAN

To Do User: BARBER, MARK A

Reminder Created: CCC CHRONIC CLINIC REMINDER

Provider encounter capture:

Full CCC Visit:

Patient Order Added: TELEHEALTH CHRONIC CARE INTERMEDIATE OFFICE VISIT (F) Order Date:

12/30/2022 13:14:07 User: BARBER, MARK A

Restrictions / PULHES Data:

12/30/2022 13:14 - BARBER, MARK A DO Reviewed and Current No Changes Needed.

Passes Data:

12/30/2022 13:14 - BARBER, MARK A DO

Reviewed: No Changes Needed

Patient Name: TIEDE, BERNHARDT I
 TDCJ#:864378

Date: 07/27/2021 14:22
 Facility: CONNALLY (CY)

Treatment history: None

Complaints since last visit: None

Diabetes

Type of Diabetes: Type 2 - Insulin dependent

Other cardiac risk factors: Hyperlipidemia, Hypertension

Treatment history for Diabetes: Pt on insulin started 6 months ago

Known end organ damage: No

Hypoglycemia / Hyperglycemia since last visit: No

Detail - End Organ Damage: No

Influenza Vaccine current: Yes

Pneumococcal Vaccine current: No

Dilated retinoscopy in past year: No

Daily exam of feet: Some days

Peripheral sensation / monofilament test in past year: No

Hyperlipidemia

History of hypothyroidism: No

Known end organ damage: No

Cardiac risk factors: Hypertension

History of chest pain or SOB: No

Hypertension

Known end organ damage: None

History of chest pain or SOB: Denies

Cardiac risk factors: Diabetes, Hyperlipidemia

B/P well controlled: Yes

Comments: EKG: 100120 NSR Lt axis deviation Inferior infarct age undetermined Abnormal EKG 73

Objective:

Physical exam:

General:

Appears in no acute distress

Appears well-nourished

Appears stated age

Head:

Normocephalic

Atraumatic

Neck:

Supple

No adenopathy

Thyroid non-enlarged, non-tender, no nodules

Eyes:

PERRLA

Extraocular movement intact

Bilateral fundi (undilated exam) normal

Conjunctivae clear

Ears:

External ears appear normal

Canals unobstructed and normal in appearance

TMs shiny, translucent, mobile

Nose:

Septum appears normal

Mucosa normal

Mouth / Throat:

Oropharynx clear

Oral mucosa hydrated and without lesions

Tonsils non-enlarged and without exudate

Chest / Axilla:

Today's Problem:
 3/24/2021

MARK "YES" IF THIS IS A TELEHEALTH VISIT

YES

S: Pt with PMH of uncontrolled DM and left leg pain in clinic today with c/o bilateral leg cramps. Pain is usually only at night. Pain wakes him up from sleep. States he takes Lasix and believes his potassium level might be low.

PEARL PATIENT CHART EXPORT

Data Exported From the Pearl EMR
 Wednesday, August 16, 2023 10:04:42 AM

**CORRECTIONAL MANAGED HEALTH CARE
 CLINIC NOTES**

Patient Name: TIEDE, BERNHARDT I
 TDCJ#:864378

Date: 03/24/2021 13:05
 Facility: CONNALLY (CY)

GENERAL: Not in any acute distress, well-nourished, well-groomed male.

HEENT: Normocephalic/Atraumatic, oropharynx intact, no ocular discharge, vision grossly intact.

CHEST: Clear to auscultation, regular and unlabored breathing

HEART: RRR, S1S2 present, no murmurs, no edema.

ABDOMEN: Soft, nondistended abdomen, bowel sounds present X 4 quads, no masses, no bruits.

GENITOURINARY: Deferred

MUSCULOSKELETAL: Ambulates with a limp to left lower extremity. No sign of bone dislocation, no paralysis

INTEGUMENTARY: No sign of trauma. No skin lesions or rashes noted.

PSYCHIATRIC/NEURO: Normal affect, responds appropriately. CN II – VII grossly intact

A:

Uncontrolled DM
 Bilateral leg pain

Plan is as follows:

Med for leg cramps - Effexor

Start potassium x 5 days

Check k level

Check HgbA1C

Check BG by fingerstick now – 173mg/dl (11/2 hr post prandial)

Schedule chart review to f/u with Lab results in 3 wks. Will start NPH insulin if A1C > = 8

Today's Problem:

SUBJECT: State briefly the problem on which you desire assistance.

On 8/13 Ms. Wagner prescribed me 600 mg Ibuprofen but as of today it is still NOT on computer at Pill window. Would you please check into and verify that it has been ordered?

Thank You!

Facility: CONNALLY (CY)

Today's Problem:

SUBJECT: State briefly the problem on which you desire assistance.

Would you please correct the dose of Glipizide 10MG? I have been taking 1 TAB 2X DAILY for years. The KOP I got yesterday calls for only 1 TAB DAILY.

Thank you - Bernhardt

Exercise: works but nothing extra ____ %

SUBJECTIVE:

COPD: emphysema, first dx 6 yrs ago at this unit by Dr. Stanley, uses inhaler maybe once every 3-4 wks if not having a cold. Has never had or wanted any other inhalers.

Has been coughing for 4 days but non productive, this happens every year and has nasal congestion. Takes vitamins that he gets in commissary. Missed losartan at pill window because he goes to work as teacher, wants to go KOP on it.

936-291-3411**Discharge Instructions for:****Tiede, Bernhardt 8****Arrival Date:****Thursday, June 22, 2023**

Thank you for choosing **Huntsville Memorial Hospital** for your care today. The examination and treatment you have received in the Emergency Department today have been rendered on an emergency basis only and are not intended to be a substitute for an effort to provide complete medical care. You should contact your follow-up physician as it is important that you let him or her check you and report any new or remaining problems since it is impossible to recognize and treat all elements of an injury or illness in a single emergency care center visit.

Care provided by: Stevenson, Zachary, MD**Diagnosis:** Transient cerebral ischemic attack, unspecified; Paresthesia of skin - left facial numbness

| | | |
|---|--|--------------------------------|
| Paresthesia Stroke Prevention Transient Ischemic Attack | | Medication Reconciliation Form |
| Private Physician Reason: TDJC infirmary physician Emergency Department Reason: If symptoms return | | None None |
| None | | |

X-RAYS and LAB TESTS:

If you had x-rays today they were read by the emergency physician. Your x-rays will also be read by a radiologist within 24 hours. If you had a culture done it will take 24 to 72 hours to get the results. If there is a change in the x-ray diagnosis or a positive culture, we will contact you. Please verify your current phone number prior to discharge at the check out desk.

MEDICATIONS:

If you received a prescription for medication(s) today, it is important that when you fill this you let the pharmacist know all the other medications that you are on and any allergies you might have. It is also important that you notify your follow-up physician of all your medications including the prescriptions you may receive today.

Patient Name: TIEDE, BERNHARDT I
TDCJ #: 864378
Date: 01/10/2023 10:37
Facility: ESTELLE (E2)
Housing: E2-1 CELL 10

This is being sent to you at the request of your medical provider. If you have questions about the information or do not understand it, you may drop a sick call request to get more information. If you currently are being treated for any medical condition, we would like to encourage you to follow your treatment plan such as taking your medication regularly, keeping your scheduled appointments in the clinic and with specialists and coming to clinic for your scheduled treatments and check-ups.

Mr. Tiede,

You have an upcoming dental appointment in two weeks for a tooth extraction. In order to avoid any bleeding complication and excess sugar in your system that increases change of infection, I have adjusted some of your medications as followed for this appointment to possibly happen:

1. Stop taking Aspirin on January 20th until your dental appointment on the 23rd to avoid excessive bleeding.
2. Your HbA1c did improve greatly since April so congrats on that! Please continue going daily for sliding scale insulin to make sure that we keep your sugar under control for the procedure.

Mr. Tiede,

You have a dental appointment on Monday. Please avoid Aspirin from Friday until your dental appointment to avoid excessive bleeding.

I have also added fingersticks twice daily until your procedure because your glucose is very high and a high risk for dental procedure post infections.

I also ordered a lab test to see what your hemoglobin A 1C is. It was 10.8 in April.

**CORRECTIONAL MANAGED HEALTH CARE
 CONSENT COVID VACCINE**

I, TIEDE, BERNHARDT I, TDCJ-ID Number: 864378 request and consent to the following services and treatments at the Texas Department of Criminal Justice:

COVID-19 Vaccine

I understand the above documented treatment(s) or medication(s) are for the following condition(s):

Prevent Coronavirus Disease 2019 (COVID-19)

I recognize that some risks to my health and well-being in the form of adverse effects from the above treatment(s) and/or medications(s) may occur. Such effects have been explained to me. I understand that potential adverse outcome(s) include but are not limited to the following:

Side effects may include but are not limited to:

- o Injection site reactions: pain, tenderness and swelling of the lymph nodes in the same arm of the injection, swelling (hardness), and redness
- o General side effects: fatigue, headache, muscle pain, joint pain, chills, nausea and vomiting, and fever
- o Remote chance of severe allergic reaction which can include: difficulty breathing, swelling of your face and throat, a fast heartbeat, a bad rash all over your body, dizziness and weakness

I have had the opportunity to ask questions and all of my questions have been answered to my satisfaction. I believe I have adequate knowledge on which to base informed consent to the provision of the noted treatment(s) and/or medication(s) and accept the risks involved. I understand I can choose to stop the treatment(s) / medication(s) at any time. I also understand my provider can discontinue treatment for clinical reasons. I am requesting and give my informed consent to the provision of the above treatment(s) and/or medications(s).

Medical Restriction Guidelines

1. Patients with ordered Medical Restriction will be screened at least once daily and documented on the Medical Restriction Flow Sheet.
2. The length of time in Medical Restriction will be 10 days from the date of exposure.
3. If the date of exposure is in the past, draw a line through the number of days which have lapsed so that only the remainder of the 10 days are available for screening.
4. The Screener will wear full Personal Protective Equipment (PPE) consisting of gloves, mask, gown and eye protection (face shield or goggles).
5. The patient will be screened for symptoms commonly associated with COVID-19 infection. Patient will have temperature taken and asked if they have a cough, shortness of breath, chills, muscle pain, fatigue, headache, sore throat, new loss of taste or smell, congestion, runny nose, nausea, vomiting, or diarrhea in the last 48 hours.
6. If YES to any of the symptoms, have the patient don a surgical mask and notify a provider for additional screening.
7. Upon completion of the Medical Restriction Flow Sheet or change of status, the flow sheet will be scanned into the patients Electronic Health Record (EHR).

**CORRECTIONAL MANAGED HEALTH CARE
 CONSENT COVID VACCINE**

I, Tiede, B., TDCJ-ID Number: 864378 request and consent to the following services and treatments at the Texas Department of Criminal Justice:

COVID-19 Vaccine

Booster

I understand the above documented treatment(s) or medication(s) are for the following condition(s):

Prevent Coronavirus Disease 2019 (COVID-19)

I recognize that some risks to my health and well-being in the form of adverse effects from the above treatment(s) and/or medications(s) may occur. Such effects have been explained to me. I understand that potential adverse outcome(s) include but are not limited to the following:

Side effects may include but are not limited to:

- Injection site reactions: pain, tenderness and swelling of the lymph nodes in the same arm of the injection, swelling (hardness), and redness
- General side effects: fatigue, headache, muscle pain, joint pain, chills, nausea and vomiting, and fever
- Remote chance of severe allergic reaction which can include: difficulty breathing, swelling of your face and throat, a fast heartbeat, a bad rash all over your body, dizziness and weakness

I have had the opportunity to ask questions and all of my questions have been answered to my satisfaction. I believe I have adequate knowledge on which to base informed consent to the provision of the noted treatment(s) and/or medication(s) and accept the risks involved. I understand I can choose to stop the treatment(s) / medication(s) at any time. I also understand my provider can discontinue treatment for clinical reasons. I am requesting and give my informed consent to the provision of the above treatment(s) and/or medications(s).

**CORRECTIONAL MANAGED HEALTH CARE
 CONSENT COVID VACCINE**

I, Tiede Bernhardt, TDCJ-ID Number: 864378
 services and treatments at the Texas Department of Criminal Justice:

request and consent to the following

COVID-19 Vaccine

I understand the above documented treatment(s) or medication(s) are for the following condition(s):

Prevent Coronavirus Disease 2019 (COVID-19)

I recognize that some risks to my health and well-being in the form of adverse effects from the above treatment(s) and/or medications(s) may occur. Such effects have been explained to me. I understand that potential adverse outcome(s) include but are not limited to the following:

Side effects may include but are not limited to:

- o Injection site reactions: pain, tenderness and swelling of the lymph nodes in the same arm of the injection, swelling (hardness), and redness
- o General side effects: fatigue, headache, muscle pain, joint pain, chills, nausea and vomiting, and fever
- o Remote chance of severe allergic reaction which can include: difficulty breathing, swelling of your face and throat, a fast heartbeat, a bad rash all over your body, dizziness and weakness

I have had the opportunity to ask questions and all of my questions have been answered to my satisfaction. I believe I have adequate knowledge on which to base informed consent to the provision of the noted treatment(s) and/or medication(s) and accept the risks involved. I understand I can choose to stop the treatment(s) / medication(s) at any time. I also understand my provider can discontinue treatment for clinical reasons. I am requesting and give my informed consent to the provision of the above treatment(s) and/or medications(s).

Medical Restriction Guidelines

1. Patients with ordered Medical Restriction will be screened at least once daily and documented on the Medical Restriction Flow Sheet.
2. The length of time in Medical Restriction will be 14 days from the date of exposure.
3. If the date of exposure is in the past, draw a line through the number of days which have lapsed so that only the remainder of the 14 days are available for screening.
4. The Screener will wear full Personal Protective Equipment (PPE) consisting of gloves, mask, gown and eye protection (face shield or goggles).
5. The patient will be screened for symptoms commonly associated with COVID-19 infection. Patient will have temperature taken and asked if they have a cough, shortness of breath, chills, muscle pain, headache, sore throat, new loss of taste or smell, congestion, runny nose, nausea, vomiting, or diarrhea.
6. If YES to any of the symptoms, have the patient don a surgical mask and notify a provider for additional screening.
7. Upon completion of the Medical Restriction Flow Sheet or change of status, the flow sheet will be scanned into the patients Electronic Health Record (EHR).

Medical Restriction Guidelines

- 1 Patients with ordered Medical Restriction will be screened at least once daily and documented on the Medical Restriction Flow Sheet
- 2 The length of time in Medical Restriction will be 14 days from the date of exposure
- 3 If the date of exposure is in the past, draw a line through the number of days which have lapsed so that only the remainder of the 14 days are available for screening
- 4 The Screener will wear full Personal Protective Equipment (PPE) consisting of gloves, mask, gown and eye protection (face shield or goggles)
- 5 The patient will be screened for symptoms commonly associated with COVID-19 infection Patient will have temperature taken and asked if they have a cough, shortness of breath, chills, muscle pain, headache, sore throat, new loss of taste or smell, congestion, runny nose, nausea, vomiting, or diarrhea
- 6 If YES to any of the symptoms, have the patient don a surgical mask and notify a provider for additional screening
- 7 Upon completion of the Medical Restriction Flow Sheet or change of status, the flow sheet will be scanned into the patients Electronic Health Record (EHR)

**CORRECTIONAL MANAGED HEALTH CARE
PROVIDER TO PATIENT COMMUNICATION**

Patient Name: TIEDE, BERNHARDT I
TDCJ #: 864378
Date: 02/11/2020 12:22
Facility: CONNALLY (CY)
Housing: 12FA1 CELL 06

This is being sent to you at the request of your medical provider. If you have questions about the information or do not understand it, you may drop a sick call request to get more information. If you currently are being treated for any medical condition, we would like to encourage you to follow your treatment plan such as taking your medication regularly, keeping your scheduled appointments in the clinic and with specialists and coming to clinic for your scheduled treatments and check-ups.

Mr Tiede,
Your BP has been running a little high. I am going to increase Losartin to 50mg PO. You will also be called for blood pressure checks.

Electronically Signed by WAGNER, PAMELA K. NP on 02/11/2020.

Electronically Signed by GREEN, JULIE V. CCA on 02/11/2020.

Comments

*Because GFR is a calculated value which is less accurate above 60 mL/min/1.73 m2, all GFR values in categories 1 and 2 (normal to mild decrease in GFR) are simply reported as >60.

Results

NOT AVAIL: Insufficient information to calculate eGFR at time of testing
